

# SAFEZONE Solar Motion LED Light

Model: SWSZSL20

## Function

1. To turn it on press the on/off button using the end of a paperclip or other small (pointed) tool.
2. Pressing the on/off button again will turn the Solar Light off.
3. When it gets dark, the light automatically turns on in dim light mode. When motion is detected, the Solar Light will illuminate the area. The light becomes dim again after 10 seconds.
4. The solar panels are charged in direct sunlight. The electrical energy is stored in the battery. The more direct sunlight, the better the charge for the battery.

Insert end of paper clip or tool here

## NOTES

1. Place the product under direct sunlight and charge for 8 hours **PRIOR** to installation.
2. If you plan not to use the Solar Light for an extended period of time, turn off the light and put in a dry place for storage. Failure to re-charge the battery, once every 3 months, will damage the battery and void the warranty.
3. If the lights begin to flash, the battery needs to be fully recharged. Place in direct sunlight for 8 hours.
4. The efficiency of solar panels depends on the direct sunlight exposure hours and weather conditions. The stronger the direct sunlight, the quicker the recharge time. Charging on rainy days will increase the charging time and affect the brightness of the light.

## Warranty

1. *Streetwise Security Products* extends a one year warranty to the SWSZSL20 for defects in materials or workmanship, with the following exceptions:
  - A) The warranty does not cover damage resulting from accident, misuse or abuse, lack of reasonable care or loss of parts.
  - B) The warranty will be voided if the unit is not charged at least once every three months, has been opened or tampered with in any way (unless by an authorized dealer), or if any unauthorized replacement parts have been used.
  - C) Conditions of Sale: Purchase of this product is an agreement by the purchaser/user to hold all sellers and manufacturers harmless of all liabilities and damages.
  - D) To Obtain Service: Contact the Authorized Dealer from whom you purchased this unit for a Return Merchandise Authorization. The return unit must be sent postage prepaid and proof of purchase is required. Damage or loss occurring during shipment is not covered by this warranty.

## Technical Specifications

Model: SWSZSL20

Solar power: 5.5V 100mA 17% conversion of power

Battery: Lithium battery 3.7 V 800 mAh

LED : 0.2W/SMD2835\*20PCS

Flux: 160 lm

Angle of Detection: 110 degrees

Distance of Detection: 10-15 Ft.

Charging time: 8 hours in direct sun

Waterproof level: IP65

Size: 3.5 x 5 x 2 inches

Net weight: 5.5 oz.
